

SALTWASH®

FOR A LAYERED SUN & SALT AIR SOAKED LOOK

Saltwash® was invented to recreate the authentic time worn painted look, which the owners of Saltwash®, grew up with in the surrounding seaside cottage porches and furniture along their coast. Their mission was to create a formula to replicate the layered, sun and salt air kissed look, while also being quick and easy to use.

WHAT IS SALTWASH® ?

Saltwash® is a base coat powder paint additive that creates a unique weathered, layered look on any surface.

HOW DOES SALTWASH® WORK?

Saltwash® is a patent pending product. Its chemical composition has an active ingredient that when added to paint and applied to any surface it begins to dry throughout all at one time. This differs from paint texturizing products and paint alone, which typically dry from top to bottom, resulting in the layers settling out.

WHAT MAKES SALTWASH® THE PREMIERE PAINT ACCESSORY ON THE MARKET?

Saltwash® is the Original and only texturizing product on the market to use actual Sea Salt and all organic products!

WHAT MAKES SALTWASH® DIFFERENT THAN TYPICAL CHALK PAINT OR OTHER SPECIALTY PAINTS?

Saltwash® is not a paint but a paint accessory, and is used as a base coat layer, for texture and authentic weathered worn look. Saltwash® is used by mixing it into any type paint.

WHAT TYPES OF SURFACES CAN SALTWASH® BE APPLIED ON?

Saltwash® can be applied on wood, metal, ceramic, glass, plastic, cement, fabric and a variety of other surfaces, with no prep work required.

CAN YOU MIX SALTWASH® IN ANY TYPE OF PAINT?

Yes. Saltwash® can be mixed in any type of paint such as a latex, oil and all specialty paints. See mixing ratios below and go to our website for more information.
